4. General Information

Practice Image

Title of the practice	Rapid Circular Contracting in Facility Management
-----------------------	---

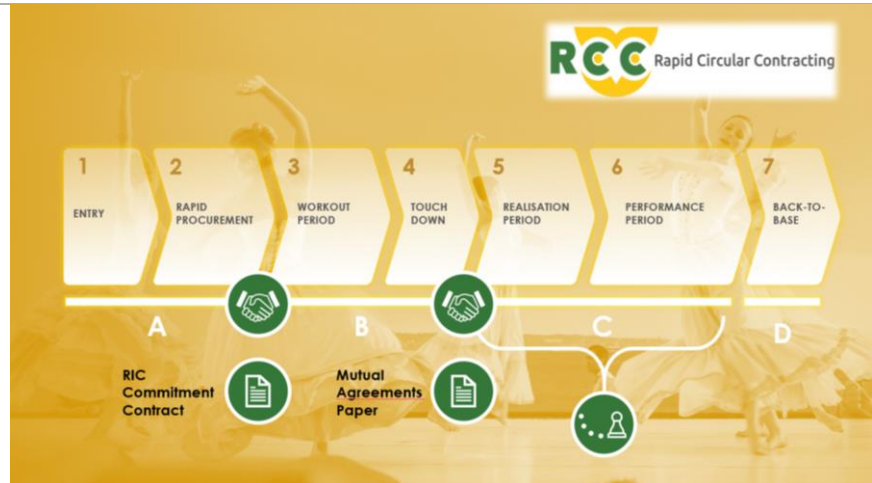

Geographical scope of the good practice*	Regional
--	----------

5. Good Practice Detailed Information

Short summary of the practice	Adopting the rapid circular contracting method in facility management leads to innovative and circular solutions for every organisation.
-------------------------------	--

Detailed information on the practice	In 'regular' procurement, the client designs the solution and requests the market to realise that solution. In this way, there is very limited space for innovation from the market. To make this change, the client co-creates its solution with the market to reach their ambitions and stimulate circular innovation. This can be done by adopting the rapid circular contracting method.
--------------------------------------	--

	The procedure and principles:
--	-------------------------------

The Safety Region Friesland (VRF) has successfully applied this method for a number of products and services, such as:

1. Hot and Cold drinks
2. Reproduction – printers & copiers
3. Garbage handling
4. Exterior landscaping
5. Interior furniture

Resources needed	Initially, an additional €5.000-10.000,- is needed to gain external advice in such a trajectory. After several of these trajectories, the client himself should be able to use the method.
Timescale (start/end date)	2018-ongoing
Evidence of success (results achieved)	In at least 5 procurement trajectories, the VRF has successfully used the method which led to innovative contracts with a large focus on circular economy and therefore, diminishing waste and energy.
Challenges encountered (optional)	<ul style="list-style-type: none"> - The method needs to be practised with, external knowledge (consulting) will be necessary in the first trajectories. - It can take more time during the first trajectories. Also, the market needs to get used to it in several cases.
Potential for learning or transfer	It is a proven method for circular procurement – working from ambitions instead of prescribing a solution. This provides clients with the possibility to change its facility management to a circular management.
